FROM: MedImpact Healthcare Systems
Subject: [Acquisition Cost Increases- Update](#)

Status: MedImpact is providing an update related to our memo from January 12th that addressed concerns related to recent manufacturer acquisition cost increases. As previously noted, acquisition cost increases are often followed by increases in the National Average Drug Acquisition Cost (NADAC) benchmark prices used by the Kentucky Medicaid program. This process typically occurs within one to two weeks of the effective date of the cost increases, following the publication of NADAC by the Centers for Medicare & Medicaid Services (CMS). MedImpact applies updated NADAC prices daily, as received. Since our original memo addressing this issue, MedImpact has received and applied hundreds of NADAC price updates. These updates may not represent all cost increases you have recently experienced; however, you may wish to reverse and resubmit claims now if you believe those claims may be subject to revised reimbursement.

Please note, this notice is not a guarantee of updated NADAC pricing or of changes in reimbursement following reversal and resubmission of claims.

Should you have any additional questions or concerns regarding NADAC pricing we encourage providers to contact Myers and Stauffer, the CMS NADAC vendor. Their contact information is below:

Toll-free help desk phone number: 855-457-5264
