**Subject:** Paxlovid Reimbursement

On May 25, 2023, the Food and Drug Administration (FDA) approved the oral antiviral Paxlovid. The manufacturer, Pfizer released new National Drug Codes (NDCs) in late October with pricing effective 11/1/2023. Previous NDCs for Paxlovid were authorized under an emergency use authorization (EUA) and were purchased by the federal government for distribution to providers free of charge. Claims for NDCs under the EUA are not reimbursed an ingredient cost, only the professional dispensing fee.

MedImpact has updated the pricing algorithm to allow ingredient cost reimbursement when NDCs which have been FDA approved are dispensed. The table below provides both the FDA approved and EUA authorized product NDCs for provider reference. Providers should continue to dispense the EUA product until their supply is exhausted.

Prescriptions dispensed prior to December 12, 2023 will be reprocessed to include the ingredient cost in the final paid amount. No action will be required by providers for previously submitted claims.
